

## **PMSC Announces Updated Brand**

*Going Back the Future with Original PMSC Logo*

**St. Petersburg, FL** — Today, PMSC officially launched their new, original logo. After 30 years in business as a premiere facility support service company, PMSC is getting back to their roots and rebranding the organization with the original logo created by the founder, Carole Metour.

“Having been in business for 30 years, a lot has changed. We’ve grown to over 200 employees. I don’t want to lose site of why I started the company in the first place. I want a bold reminder of our roots to ensure we never forget our humble beginnings and customer-first attitude that made us successful,” said Ms. Metour, CEO at PMSC.

The update to the original logo on PMSC’s 30<sup>th</sup> anniversary is no coincidence. As a founder of a woman-owned small business, Ms. Metour and her team reflected on their success and decided that now is the perfect time to celebrate the catalyst that made PMSC an industry leader.

### **About PMSC**

PMSC was founded in 1986 in California by the company’s President and Chief Executive Officer, Carole Metour. With the headquarters in St. Petersburg, Florida since 1993, PMSC has grown to over 200 employees and craftsmen across its network of contract sites throughout the contiguous United States.

PMSC received its 8(a) certification from the Small Business Administration (SBA) in July 2001 for performance of work under NAICS Code 561210, and was quickly awarded multiple 8(a) or sole source contracts in the subsequent two years. However, the majority of contracts with the Federal Government were awarded competitively, either as a small business set-aside or unrestricted. PMSC ‘graduated’ from 8(a) in May of 2010, and currently is designated as a Woman Owned Small Business.

PMSC has enjoyed over three decades of growth and continues to excel in delivering Complete Facilities Maintenance (CFM) and Operations and Maintenance (O&M) to the Federal Government. PMSC continues to be one of the top “go to” companies to successfully turn around underperforming contracts on a very short schedule.

*PMSC is a registered trademark of The Preventive Maintenance Services Company, dba PMSC in the United States.*
